

# Agenda

## MPO Modeling Working Group

### *February Meeting*

**Date:** 2/26/2016

**Time:** 9:30 AM – 11:00 AM ET

**Location:** University at Albany, AS 123 ([map](#))

**Web-Conference Location:** GoToMeeting or Phone Conference Call

#### **NPMRDS Web-tools**

**Please join my meeting from your computer, tablet or smartphone.**

<https://global.gotomeeting.com/join/488140357>

**You can also dial in using your phone.**

**United States (Long distance): +1 (408) 650-3112**

**Access Code: 488-140-357**

#### Topics:

1. NPMRDS Web-Tool Update
  - a. Routes
    - i. Route Creation
      1. Functional Class Purity for Performance Measures
      2. Route Length to TMC length equal
    - ii. Route Performance Page Updates
      1. New Layout
      2. Integrated Data Quality Visualizations
      3. Reliability Measures
        - a. Discussion of Reliability Measure Calculation.
2. Future Features Discussion
  - a. Original Features
    - i. County-wide Map Tools showing all the links in red/yellow/green
  - b. Incident Page
    - i. Incident page redesign.
    - ii. Incident Query – Data Fusion Engine Validation Episodes
      1. Pick an incident and drill into the data which is the opposite of what we've currently built, where the data defines the incident
      2. One question: Open and Closed Status in Transcom as compared to NPMRDS anomaly detection of start and end of incident.
  - c. Ability to download data in csv file, shapefile and png/svg
  - d. Truck Data vs Combined vs Car Data
  - e. Threshold Speeds? Linked to functional class
    - i. Reliability = Current speed / Threshold speed
  - f. Statewide Page
3. **Call to Action: Send your traffic reports to AVAIL [ekrans@albany.edu](mailto:ekrans@albany.edu)**
4. **In-person training Sessions**
  - a. **Modeling Working Group practitioners for route building**
  - b. **High level training**
