**1. Introductions**

Alex Muro (AVAIL) opened the meeting and welcomed the participants.

**2. NPMRDS Tools – On Dev**

- The AVAIL team provided an update on recent tool development activities.
- By the next meeting, the tool should have AADT for all NPMRDS segments plus many other segments.
- The team currently does not have values for all of the extended NPMRDS data, but will have that soon.
- The new Shapefile Downloader function will allow the user to customize what they want to include in the file. The team added a loading indicator to let users know that loading is actually working.
- The team added speed percentile.
- A WG member noted that some of the fields that are in the shapefile documentation are not actually in the downloaded shapefile. The Team will reconcile this.
- The team is determining if they can add speeds into development of isochrone maps.

- The remainder of the meeting was cancelled due to a fire drill. If there are questions about the other items, please reach out to the team.

### **3. Next Meeting**

The next MWG meeting will take place on October 25, 2019.
